## Team 6
Puskar Dev (puskar.dev@mavs.uta.edu)
Hannah Nguyen (hannah.nguyen3@mavs.uta.edu)
Safi Ullah (safi.ullah@mavs.uta.edu)

## Team 7
Anthony Nguyen (antony.nguyen@mavs.uta.edu)
Jonathan Medina (jonathan.medina3@mavs.uta.edu)
Toby Park (toby.park@mavs.uta.edu)

## Iteration 1 Review for Team 7

| Finder | Severity [major, minor, open issue] | Kind [missing, extra, wrong] | Defect Type | Description |
|---|---|---|---|---|
| Team 6 - Hannah | Major | Missing | Description | There is no feedback from customers listed in the iteration 1 deliverable document. Since there is minimal functionality implemented into the app so far, there could be some feedback based on the UI design. |
| Team 6 - Hannah | Major | Missing | Description | No description in the iteration 1 deliverable document of who the customers and users are and what they really want. |
| Team 6 - Hannah | Major | Missing | Design Defect | From my understanding, the Pomodoro Technique includes doing time intervals based on a specific task. So, in your web app, should the timer start based off of the user's chosen task and should the specific task be displayed on the timer screen? |
| | | | | |

| | | | | |
|---|---|---|---|---|
| Team 6 - Puskar | Open | Missing | Description | Will the webapp be able to play relaxing sounds while the 25-mins interval is on or will it play just during the break interval? |
| Team 6 - Puskar | Major | Missing | Design Defect | What kind of notifications will the Do Not Disturb feature be able to mute for the user? Will it be the notifications from the browser only, or also from the OS. |
| Team 6- Puskar | Open | Missing | Design Defect | Will there be a checklist / tasks completed feature in the web app that lets the user record the completed task? How will the webapp display the graph of user statistics without having such feature? |
| Team 6- Safi | Open | missing | description | In the breaks, when you do give suggested activities will there be videos or pictures on how to do these activities? For example, if they are like doing quick yoga sessions, breathing techniques, exercises, etc. how would you show the user to do these if they are newcomers to these types of activities? |
| Team 6- Safi | minor | Missing | description | It is stated that users will be able to customize various features. What do these features include? What can they customize? Can the user customize it to dark mode? More details should be presented ahead of time, so user feedback can be given. |
